

Project Initialization and Planning Phase

Date	26 June 2026
Team ID	xxxxxx
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
A professional attending networking events and conferences	Start meaningful conversations and build valuable connections	I struggle to think of relevant and personalized conversation starters	I don't know much about the person, their background or shared interests	Nervous and less confident during networking opportunities

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An instructor or TA reviewing student messages and emails	Quickly gauge how a student is feeling so I can respond appropriately	I have to manually read each message and guess the emotional tone	Interpreting sentiment and crafting an empathetic reply takes time and effort	Overwhelmed, and worried about missing struggling students
PS-2	A student studying independently and stuck on a difficult topic	Get quick, empathetic guidance when I'm confused or frustrated	I struggle to put my feelings into words or find help that fits my mood	Forums and generic resources don't understand my emotional state	Frustrated and unsupported when learning alone
PS-3	A self-paced learner tracking my study progress over time	Understand patterns in my confusion or frustration to improve study habits	I have no way to see how my emotions change across study sessions	No tool logs and visualizes my emotions alongside my learning challenges	Directionless and unaware of my own learning patterns
