Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I don't understand why I keep getting stuck on this topic." • "I wish something actually understood how frustrated I am right now." • "I need clearer, more encouraging explanations, not just more resources."	THINKS • "Am I the only one who finds this confusing?" • "Will this tool really understand what I'm feeling, or just give generic tips?" • "I need guidance that matches my mood, not a one-size-fits-all answer."
PERSONA NAME Alex Rivera <i>(Student / Self-Paced Learner)</i>	
DOES • Pastes study problems into forums or chatbots looking for help. • Re-reads the same material multiple times without a clear plan. • Tracks study hours but never their emotional patterns while learning.	FEELS • Frustrated when stuck without personalized support. • Anxious about falling behind peers during self-study. • Relieved and motivated when given clear, empathetic guidance.
