Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
/project-root
/data - Training & evaluation datasets for emotion labels
/models - Saved BiLSTM and BERT model checkpoints
/src - Preprocessing, training, and inference scripts
/app - Streamlit application files
/logs - interactions.csv and feedback.csv
README.md - Setup and run instructions
requirements.txt - Python dependencies
.env.example - Sample environment configuration (Gemini API key)
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not yet deployed — currently runs locally via Streamlit
Login Credentials (Demo)	Not applicable — no authentication implemented in this version
Platform / Hosting Provider	Planned: Streamlit Community Cloud
Repository Link	GitHub Repository - Emotion Detection & Learning Support Engine
Demo Video Link	Attached separately as part of the submission

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

Python 3.8 or above, pip, ~4 GB RAM, a Gemini API key, internet connection for package installation

Step 1: Clone the repository: `git clone <repo-url>`

Step 2: Create and activate a virtual environment

Step 3: Install dependencies: `pip install -r requirements.txt`

Step 4: Configure environment: copy `.env.example` to `.env` and add your Gemini API key

Step 5: Start the application: `streamlit run app.py`

Step 6: Open browser at `http://localhost:8501`

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	No user authentication implemented	Planned for a future release
2	Application is not yet deployed to the cloud	Currently runs locally; cloud deployment planned
3	Only English-language input is supported	Multilingual support planned as a future enhancement
