

Communication

Date	2 July 2026
Team ID	—
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. Since this project was developed by a single team member, this document outlines how self-tracking, progress reviews, and mentor/faculty check-ins were managed throughout the project lifecycle.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Self Check-in / Daily Planning	Daily	Personal Notes / Google Keep	Individual (Self)	Track daily tasks, progress, and upcoming work
2	Progress Update	Weekly	Google Meet / Email	Self, Mentor/Faculty	Review completed model training / dashboard tasks and plan next activities
3	Issue / Bug Resolution	As Needed	GitHub / Documentation	Individual (Self)	Resolve coding issues, model errors, and technical challenges
4	Mentor/Faculty Review	Bi-Weekly	Google Meet	Self, Mentor/Faculty	Demonstrate project progress and collect feedback
5	Final Demo Rehearsal	Once	Self-Recorded Practice	Individual (Self)	Practice final project presentation and demonstration
6	Documentation Review	Once	Google Docs	Individual (Self)	Review project report and supporting documents

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Difficulty integrating and aligning the BiLSTM and BERT emotion classifiers	Standardized the preprocessing pipeline and tested both models independently before integration
2	Gemini API rate limits and response latency during testing	Added request retries and response caching to keep the app responsive
3	Balancing dataset preparation, model training, and dashboard development single-handedly	Created a personal task checklist and dedicated fixed time-blocks for each activity
